UTU-075884

September 23, 1998

TOM MUNSON
UTAH DIVISION OF OIL GAS AND MINING
1594 WEST NORTH TEMPLE SUITE 1210
SALT LAKE CITY UT 84114-5801

Dear Mr. Munson:

Enclosed is a copy of the following mining notice:

BLM Serial Number Operator

UTU-075884 Richard Stone, d.b.a. Unique Minerals

This is sent to you in accordance with the Memorandum of Understanding between our two agencies.

Should you have questions regarding this notice please call Sheri Wysong at (801)743-3124.

Sincerely,

Ron Teseneer
Geologist

Enclosure
Notice of Intent

UT -055-3809

(For BLM use) UTV - 075884
Date Received

NOTICE

OR

PLAN OF OPERATION

(For operations Proposed Under the 43 CFR 809 Regulations)

INSTRUCTIONS TO CLAIMANT/OPERATOR: Circle "Notice" (above) if proposed mining activity within the project area will disturb a total of five (5) acres or less during the calendar year. Circle "Plan of Operations" if disturbance will exceed five (5) acres during the calendar year or if operations are within one of the specially designated areas described in 43 CFR 3809.1-4 (b). Complete the form in as much detail as possible. Additional sheets may be used if necessary. Use maps or sketches where appropriate (maps or sketches are required for submitted plans of operations and are recommended for submitted notices). A review of the 43 CFR 3809 regulations should be conducted prior to completion of this form and submission to the appropriate BLM office.

OPERATOR INFORMATION:

NAME: UNIQUE MINERALS.

ADDRESS: 1359 Park Street, Salt Lake City UT 84105

PHONE (801) 466-2006

CLAIMANT INFORMATION (If different from operator information)

BARRY KANDEL, GERALD L McCURDY, JASON STONE, RICHARD STONE.
CLAIR RODGERS, NELDON ADAIR, TERRY COOK, TERRY MURRAY.
CLAIMANTS AND OWNERS EN TOTO OF THE OPERATOR. RESIDENT AGENT,
RICHARD STONE. RESIDENT OFFICE 1359 PARK STREET, SALT LAKE CITY
UT 84105. ALL NOTICES TO BE DIRECTED AT THIS ADDRESS.

CLAIM INFORMATION (Claim names, circle claim types (lode, Placer, Mill Site, Tunnel), UMC serial Number. List only the claims where the disturbance is proposed)::

PLACER, LODE CLAIM AT: Millard County, SE 1/4 of section 24, R 13 W.T.S.
17 So. (SLM)

DESCRIBE PREEXISTING DISTURBANCES AND STRUCTURES OR INDICATE
ON MAPS OR SKETCHES (Mine and Mill Facilities, Working, Tailings, Dump Areas,
etc... It may be to your advantage to document existing disturbance with photographs):

A claim was worked on the exact spot where operations will take place. The claim was abandoned several years ago. There are no structures or facilities on that location. See photographs.

DESCRIBE ACCESS ROUTES (Existing and proposed, for proposed road construction specify length and width in feet):

Access routes to the mine: Take the Trilobites dirt road nineteen miles to the road to the claim. There is an existing road to the claim that is 10 feet wide, and seven (.7) tenths of one mile long. There are no further roads proposed.

PROPOSED OPERATIONS: Describe the entire proposed operation, including the type of material being removed and all surface disturbing activities (road construction, drilling, trenching, backhoe and bulldozer exploration, mining, waste disposal, etc.). List all mechanized earth moving equipment to be used during the operation and state if any explosives are to be utilized. Describe and furnish a map or sketch, when applicable, showing existing surface disturbances, structures, facilities, etc., and the location and size of areas where surface disturbance are proposed, including existing and/or proposed routes of access. Calculate the total acreage proposed for disturbance (1 AC. 1= 43,560 sq. ft.).

This unique and rare deposit of slate protrudes at the surface and has a large vein going down to an undetermined depth from the protrusions. Much of the slate material has fallen from the deposits to the bottom of the grade. This loose material will be scooped up with a front end loader, fed into a grinding machine, and loaded into bags for shipment. Once loose material is taken up, the outcroppings will be removed by a front end loader, and later by a small bulldozer. All the protruding slate material appears loosely packed, and will not need explosives for removal. The mine will be open pit. There will be no waste nor tailings. All top soil will be saved and stored in a pile on the east side of the mine for reclamation work. See map and photos.

DATE OPERATIONS ARE PROPOSED TO COMMENCE AS OUTLINED IN THIS SUBMITTAL - (Month, Day, Year):

Operations are scheduled to begin on Oct 8 1998. There is no proposed completion date since the deposit is sizable. However, as an area in the five acre plot comes to completion, reclamation work will follow immediately with the spreading of top soil, and seeding with grass and shrubs native to the area.

PROPOSED RECLAMATION: Describe the proposed reclamation procedures and other measures to be taken to prevent unnecessary or undue degradation of the lands, including measures to be taken if a period of non-operation is anticipated. When reclamation has been completed, the Authorized Officer of the BLM shall be notified so that an inspection of the area can be made.

We do not anticipate periods of non-operation. We propose to spread topsoil and plant same as the operation progresses. This operation is on a hill. There is very little vegetation on the hill, and so disturbance will be minimal. However, our reclamation work will leave the site with heavier vegetation than before, since the minerals take up substantial surface where vegetation cannot grow. There will be minimal chance of erosion since the top soil will be removed and stored in a pile. There are no surface water sources in the area so material cannot be washed away. There is a small dry stream bed at the base of the operation, but there will be no operation, nor topsoil storage near the bed in case of flash flooding. It appears that flash flooding in the stream bed has been minimal by it's appearance. Since reclamation will be done as the project progresses, we project that it will be at least 90% completed by the end of mining operations.

I hereby declare that I, or persons I have authorized to do so, will complete all necessary reclamation of areas disturbed during the course of my operations to the standards described in 43 CFR 3809.1-3(d) and that reasonable measure will be taken to prevent unnecessary or undue degradation of the federal lands during operations.

Signature of Claimant or Operator

Sept 23, 1998
Date

NOTICE TO CLAIMANTS/OPERATORS:

1. A notice submitted in relation to the 43 CFR 3809 regulations DOES NOT require approval from the BLM. However, notification of such activities shall be made at least 15 days before commencing operations. Approval of a submitted plan of operations is required from the BLM prior to commencing operations. The BLM will promptly acknowledge receipt of a plan and will notify the claimant/operator of the status of the plan within 30 days of receipt.
2. Approval of a plan of operations does not constitute certification of ownership to any person named as claimant/operator herein, nor does approval constitute recognition of the validity of any mining claims named herein.
3. Information and data submitted and specifically identified by the operator as containing trade secrets or confidential or privileged commercial or financial information should be attached to a separate page and cited in the text of the notice or plan of operations. This information will be filed separately by the BLM and will not be available for public inspection.
4. Failure of an operator to file a notice under 3809.3 or a plan of operations under 3809.1 - 4 will be subject to the operator, at the discretion of the authorized office, to being served a notice of non-compliance or enjoined from the continuation of such.
